Insight for SAP Sybase – Use Rights

1. **CORES:** When counting cores, cores are the total number of cores within all CPUs made available by the hardware on which the Software is deployed (irrespective of any other virtual or operating system limitations that may be imposed). The total number of cores must be a maximum integer.

2. Insight for SAP Adaptive Server Platform: The total number of cores licensed represents the maximum total cumulative cores which Insight for SAP Adaptive Server Platform may be installed and Used, counted in accordance with item 1 above.

3. Insight for SAP ASP includes the following Software: Insight for SAP Adaptive Server Enterprise, Insight for SAP IQ, and Insight for SAP Replication Server.

4. Insight for SAP ASE, Edge Edition: may only be deployed on a server having a maximum of 8 cores (counted in accordance with item 1 above) and includes a limited runtime of replication functionality to be used only in conjunction with Insight for SAP ASE, Edge Edition, solely for disaster recovery purposes.

5. Insight for SAP Replication Server: If Insight for SAP Replication Server is licensed as an individual Software line item it is restricted for Use with the Insight for SAP ASE database (and only where such Insight for SAP ASE database is licensed) or for Use with an alternative database, provided the necessary Option has been Licensed. The Use of any other database product (whether licensed separately by Licensee) by or by way of the Insight for SAP Replication Server is strictly prohibited.

6. Insight for SAP Replication Server: Includes Insight for SAP Sybase SQL Anywhere database, which may only be Used as the metadata repository for the Insight for Replication Server Software (where licensed) and for SQL language parsing.
